

Catalog Item Changes for 2023 Biennium Budgeting

Application Hosting.NET Server Environment EA (consolidated with Application Hosting .NET Server Environment)

Application Hosting Alternate Server Initial Setup (consolidated with Application Hosting .NET Initial Setup)

Application Development AI (consolidated to Application Development)

Application Development .NET (consolidated to Application Development)

Software Configuration Management Initial Setup (consolidated to Software Configuration Management)

Software Configuration Management Ongoing Support (consolidated to Software Configuration Management)

Application Hosting Shared Environment Additional Disk Space (consolidated with Live Storage)

ECM Disk Storage (consolidated with File and Object Storage)

Database Hosting – Oracle Database Backup (consolidated with Live Storage)

Database Hosting – SQL Database Backup (consolidated with Live Storage)

Created the End User Productivity Rate to bundle Email, Email Archive, and Skype for Business

Collapsed Mainframe Compute, Mainframe Storage, and Mainframe User ID into just Mainframe Services with flat billing

Bundled MDM with VDI for those who are consuming VDI\UDW

Changes we will need to make for the next biennium are our ECM catalog items as FileNet licenses differently than any other software
